

QuantumClean® and Champ Asia Joint Venture Completes Final Phase

Joint venture brings QuantumClean's technology-driven quality services to broader international semiconductor market, expands scope of services available to current customers

Dublin, PA (PRWEB) June 26, 2006 -- QuantumClean, the leading provider of <http://www.quantumclean.com> [Outsourced Parts Cleaning], process tool part restoration and surface treatment for semiconductor fabricators, today announced that the final step of a highly anticipated product and technology transfer between QuantumClean and QuantumClean Asia has been completed. According to senior company officials, the new QuantumClean Asia Advanced Technology Cleaning Center™ (ATCC™) based in Singapore was launched in January 2006 and is the culmination of a joint venture between QuantumClean and Champ Asia. The technology transfer will allow QuantumClean Asia to establish a new standard of quality and proprietary services which provides process improvement through consistently cleaner parts® that was previously unavailable to the Asian marketplace.

During the technology transfer, <http://www.quantumclean.com> [QuantumClean] shared its proprietary cleaning methods, technologies, and processes with QuantumClean Asia. The two companies also integrated their business models to ensure a consistent standard of service and support.

"We are excited about the potential of this new joint venture as it will allow us to provide a consistent service offering to our international customers and extend our reach into new markets throughout Asia," said the Global Director of Sales & Marketing for QuantumClean, Maceo Ward.

QuantumClean Asia has a broad strategic vision to establish leadership in the Asian marketplace based upon its unique capabilities in material sciences and surface treatment. For example, QuantumClean Asia has enabled its customers to significantly reduce their on-hand spare parts inventory by compressing the cleaning cycle and extending part life through the company's patented Single Part Chemical Cleaning™ (SPCC™) method which incorporates Lean Manufacturing principles. The company manages the full logistics services loop for its customers, which includes <http://www.quantumclean.com> [parts cleaning], analytical and engineering services, spares replenishment, and refurbishment services. The Asian Market can now receive the same comprehensive service offering and industry expertise that has long been associated with QuantumClean in the United States.

About QuantumClean®

QuantumClean (Quantum Global Technologies, LLC) is the leading provider of Outsourced Parts Cleaning, process tool part restoration and surface treatment for semiconductor fabricators. The company operates technologically innovative cleaning centers in every major semiconductor market across the United States and Asia, providing process improvement through consistently cleaner parts that exceeds industry standards, dramatically reducing its customers Total Cost of Ownership. Founded in 2000, QuantumClean is headquartered in Dublin, Penn. with Advanced Technology Cleaning Centers in the Silicon Valley, Pacific Northwest, Southwest, Colorado, Texas, New England and the Mid-Atlantic regions.
